

## Special Issue

# Plant Extracts Used to Control Microbial Growth: Efficacy, Stability and Safety Issues for Food Applications

### Message from the Guest Editors

Plant-based extracts include several compounds endowed with antimicrobial activity (e.g., phenolic compounds, terpenes, isothiocyanates) and have attracted significant attention due to their efficacy against spoilage microorganisms (including bacteria, yeasts, and fungi) and foodborne pathogens. The antimicrobial action of plant extracts (e.g., control of microbial growth, reduction in biofilm production) depends on the chemical composition of the extract and the microbial targets. Despite the antimicrobial action of plant extracts, their use as food preservatives is limited by their stability under processing or storage conditions. Therefore, several strategies have been proposed to enhance their stability (e.g., encapsulation, inclusion in biopolymers, spray-drying, and so on). However, plant extracts can be contaminated with several toxic compounds or accumulate dangerous compounds (e.g., heavy metals, mycotoxins, residues of crop protection products). For this reason, safety issues related to the use of plant extracts are of great interest. Against this background, the Special Issue aims to collect original papers and reviews on this topic.

### Guest Editors

Dr. Loris Pinto

Institute of Sciences of Food Production, National Research Council of Italy (CNR-ISPA), Bari, Italy

Dr. Jesus Fernando Ayala-Zavala

Emerging Technologies Laboratory, Food and Development Research Center (CIAD), Sonora, Mexico

### Deadline for manuscript submissions

closed (28 March 2024)

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

---

### Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
