# The Effect of Processing Methods in Food Quality and Human Health: Latest Advances and Prospects

### Message from the Guest Editors

As of this Special Issue of Foods “The Effect of Processing Methods in Food Quality and Human Health: Latest Advances and Prospects”, we invite you to provide original research contributions, as well as review articles, related with the novel food processing technologies for retaining food quality and food components with benefits for human health. The novel technologies for food processing include High-Pressure Processing (HPP), Pulsed Electric Fields (PEF), Ultrasound Processing (US), etc. These results would be helpful for developing processes that better preserve the original quality properties of raw foods

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.
