Special Issue

Rapid Analysis Technology for Food Quality and Safety

Message from the Guest Editors

The importance of safe and high-quality food products is undeniable. Consumer demand for increased food quality and safety assurances has led to the food industry and services providing verifiable proof. In addition, consumers are taking an extraordinary interest in how food is produced, processed, and marketed and are continuously calling for their governments to accept greater responsibility for food safety and consumer protection. Moreover, the global food trade places substantial obligations on importing and exporting countries to strengthen their food control systems and implement risk-based food control strategies. Therefore, in order to reduce assessment inconsistencies and production costs, rapid, reliable, and robust analysis technology for food quality and safety is desperately needed, which encourages us to assemble the latest studies into this Special Issue, entitled "Rapid Analysis Technology for Food Quality and Safety."

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer
reviewed scientific journal that publishes original
articles, critical reviews, case reports, and short
communications on food science. Articles are released
monthly online, with unlimited free access. Currently,
Foods has been indexed by the Science Citation Index
Expanded (SCIE - Web of Science), PubMed, and
Scopus. Our aim is to encourage scientists,
researchers, and other food professionals to publish
their experimental and theoretical results as much detail
as possible. We therefore invite you to be one of our
authors, and in doing so share your important research
findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia
1. Department of Food Science, Purdue University, West Lafayette, IN
47907, USA
2. Department of Comparative Pathobiology, Purdue University, West
Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1
(Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 14.9 days after
submission; acceptance to publication is undertaken in 2.6
days (median values for papers published in this journal in
the first half of 2025).
