

## Special Issue

# Safety and Quality Assessment of Novel Food

### Message from the Guest Editors

The growing human population and the need for sustainable food systems capable of reducing the pressure on the environment are shaping the global food system. Novel food and novel technologies represent potential solutions to the current situation. The use of uncommon food sources may represent a solution to protein demand and, by increasing the biodiversity of our food systems, could reduce and redistribute the pressure on the environment. Novel processes and technologies, driven by the concepts of circular economy, waste reduction, and efficiency, would help this revolution to reach its goals. However, a *conditio sine qua non* to realize this scenario is the assessment of the safety and the quality of products originating from such novel food and technologies. Currently, the lack of safety data is slowing down this revolution. Authors are encouraged to submit original studies and high-quality reviews on the safety and quality aspects of novel food and technologies, such as microbiology, chemistry, authenticity, composition, epidemiology, toxicity, hazard identification, and risk assessments.

### Guest Editors

Dr. Simone Belluco

Department of Food Safety, Istituto Zooprofilattico Sperimentale delle Venezie, Legnaro, Italy

Dr. Alessandra Tata

Istituto Zooprofilattico Sperimentale delle Venezie, Laboratorio di Chimica Sperimentale, Vicenza, Italy

### Deadline for manuscript submissions

closed (30 June 2022)

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

---

### Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
