

Special Issue

Multi-Sensory Appreciation and Evaluation toward Foods: Gustatory, Sight, Touch, Smell

Message from the Guest Editors

As an important extension of food product evaluation, multi-sensory studies have received increasing attention due to the preferences of consumers. Sensory complexity is associated with the number of perceived sensations, including vision, tactility, taste, and flavour. Research or methodologies for these above senses will definitely improve the evaluation standard of food quality. Thus, this Special Issue focuses on food applications, in which the study of the multi-sensory plays a key role. We encourage submissions on innovative approaches to study sensory perception in relation to preferences, choices, and other types of behaviour. Additionally, we welcome motivational studies on new instrumental development, food preferences regarding sensory and environmental factors, statistical modelling related to acceptability and food quality, consumer-driven product processing, consumer experience and influences, food attractiveness enhancement, chemometrics and data mining.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
