Application of Protein in Plant-Based Food: Processing, Function, and Health

Message from the Guest Editors

With the upgrading of consumers' consumption concept and the rise in vegetarian culture, plant-based foods are expected to become the main trend in the food industry in the coming years. New products such as "vegetable meat", "vegetable eggs", and "vegetable milk" have entered the market in large numbers. A diversified plant-based food will contribute to the sustainable development of the environment system and enhance the diversity and stability of the food system. Proteins are significant food components. Due to their unique function properties, such as emulsification and gelation, they can show their performance in the processing of plant-based foods. The goal of this Special Issue on "Application of Protein in Plant-Based Food: Processing, Function, and Health" is to invite authors to contribute original research articles as well as review articles focused on the development of plant-based foods, including their processing and modification, conformation and functional properties, and health benefits through the application of protein. It is our pleasure to invite you to submit to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
