

Special Issue

Sustainability of Olive Oil System

Message from the Guest Editors

Sustainability, defined as ‘meeting current needs without compromising the future’. However, new concepts of sustainability, sometimes referred to as “sustainagility”, consider also the properties and assets of a system that sustain the ability (agility) of agents to adapt and meet their needs in new ways, preparing for future unpredictability and unforeseen changes. Therefore, resilience must coexist with adaptive capacity for real long-term sustainability.

Consumers pay more and more attention to the sustainability of the food supply chain; thus, sustainable development is a need for all food processes. In particular, since the olive oil sector has a well-established historical tradition, any change and innovation aimed at obtaining a sustainable development needs not only to be analyzed in terms of environmental, economic, and social aspects, but also to be significantly improved and closely monitored. Thus, the main goal of this Special Issue is to collect papers able to increase sustainability knowledge in the olive oil processing chain, in order to move a significant step forward in future developments.

Guest Editors

Prof. Dr. Cristina Alamprese

Prof. Dr. Emma Chiavaro

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
