Special Issue

Understanding Food in the Terroirs of the Arctic and High North

Message from the Guest Editors

Dear colleagues. The relationships between foods and culture, foods and nature, and foods and people are avenues to explore the past, present and future of the planet and how its cultures and societies evolve. This Special Issue on 'Understanding Food in the Terroirs of the Arctic and High North' aims to discuss how foods partake in shaping Arctic everyday practices and lifestyles in times of drastic social and environmental changes. This includes seeing how food relates to the construction and conservation of cultural and natural landscapes and the exploration of activities connected to leisure experiences, which also include tourism. The Special Issue welcomes submissions that deal with the understanding of foods in the Arctic and high North regions from the perspectives of humanities and social sciences, economics and behavioral sciences. technology and environmental sciences. The objective of this Special Issue is to publish original and innovative research from both qualitative and quantitative designs, drawing on traditional, as well as disruptive, methodological approaches. Best regards,

Guest Editors

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, Foods has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

- 1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
- 2. Department of Comparative Pathobiology, Purdue University, West Lafavette. IN 47907. USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
