Yeast in Food and Beverages Production

Message from the Guest Editors

The field of fermented food and beverages is becoming increasingly important, not only because of the growing demand of the market pushed by more exigent consumers. In this regard, research is focusing on a more effective and safe microbial role in the human health. Until now, the role of yeasts was simply related to carrying out fast and safe processes. However, today, research is turning towards the study of what yeasts can confer to food and beverages, beyond their purely technological role. Indeed, there has been great progress investigating the role of yeast in organoleptic quality of product, health-promoting compounds and probiotic activity. Our goal is to publish original papers or reviews to contribute to the knowledge on fermented food and beverages where yeasts contribute to ensuring the organoleptic qualities of the product but also serve to enhance the nutraceutical characteristics and/or and to make products with high added value.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
