

Special Issue

Forecasting in Coastal and Offshore Environments

Message from the Guest Editors

The possibility of forecasting the evolution of any environmental variable is the basis for planning and subsequent decision making. In the field of coastal or offshore engineering, this has become especially relevant in recent decades in view of the new situation established by the fight against climate change. This Special Issue aims to gather scientific articles that are directly related to forecasting in any field in the marine and offshore environment as well as any research that can also serve as a basis for forecasting in these fields. Within this context, we welcome studies that are related, among other things, to maritime work (coastal, port, and offshore activities), coastal evolution, climate change, sea level rise and its influence on the design, construction and/or maintenance of maritime infrastructures, aspects of sustainability at sea, and marine renewable energies, including offshore wind power, etc.

About the Journal

Message from the Editor-in-Chief

The new open access journal *Forecasting* provides an interdisciplinary forum for all aspects related to the immensely broad field of time series analysis and forecasting. The range of applications in forecasting is enormous, from energy forecasting or economic analysis of stock indices prediction, climate forecasting, chemical or natural process forecasting, etc. It is the aim of the journal to publish relevant topical contributions for the scientific community of forecasting in a timely manner. We would like to invite you to contribute to the journal by sending us your high quality research papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Sonia Leva

Department of Energy, Politecnico di Milano, 20156 Milan, Italy

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Multidisciplinary Sciences) / CiteScore - Q1 (Economics, Econometrics and Finance (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.3 days (median values for papers published in this journal in the second half of 2024).
