

Special Issue

Economic Forecasting in Agriculture

Message from the Guest Editor

The issue is focused on Economic Forecasting in Agriculture. The topic is wide from one point of view. On the other hand, it is very special. The topic is very important due to the fact that agriculture is a strategic sector of every economy of the world. It is very sensitive to every input. There are many risks. However, the outputs must be guaranteed to people (citizens, voters). However, our planet is changing. There are many crises. The most serious we can await. This aim can help us to understand the future of this strategic sector. The Special Issue will provide space to discuss partial results of our research and combine them into a complex view of the coming years.

- Commodities yields forecasting;
- Commodities prices forecasting;
- Agricultural enterprises planning;
- Financial plans of agricultural enterprises;
- Weather derivative estimating.

About the Journal

Message from the Editor-in-Chief

The new open access journal *Forecasting* provides an interdisciplinary forum for all aspects related to the immensely broad field of time series analysis and forecasting. The range of applications in forecasting is enormous, from energy forecasting or economic analysis of stock indices prediction, climate forecasting, chemical or natural process forecasting, etc. It is the aim of the journal to publish relevant topical contributions for the scientific community of forecasting in a timely manner. We would like to invite you to contribute to the journal by sending us your high quality research papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Sonia Leva

Department of Energy, Politecnico di Milano, 20156 Milan, Italy
