Forecasting Commodity Markets

Message from the Guest Editors

We all know that fluctuations in commodity prices exert a tremendous impact on the global economy, but also everyday life of many individuals. For that reason, understanding commodity price dynamics and the ability to formulate their reliable forecasts are important to take better economic policy or investment decisions. The key question we ask in this SI is whether it is possible to develop a method that can be successfully applied in forecasting commodity prices. We welcome submissions: - Discussing short and long-term forecasting; - Focusing on individual as well as a broader range of commodities; - Using traditional econometric models as well as machine learning methods or technical analysis. The ultimate goal is to identify methods that allow us to better understand the dynamics of commodity markets and hence which can be exploited in practice in decision-taking process.

About the Journal

Message from the Editor-in-Chief

The new open access journal *Forecasting* provides an interdisciplinary forum for all aspects related to the immensely broad field of time series analysis and forecasting. The range of applications in forecasting is enormous, from energy forecasting or economic analysis of stock indices prediction, climate forecasting, chemical or natural process forecasting, etc. It is the aim of the journal to publish relevant topical contributions for the scientific community of forecasting in a timely manner. We would like to invite you to contribute to the journal by sending us your high quality research papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Sonia Leva

Department of Energy, Politecnico di Milano, 20156 Milan, Italy

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Multidisciplinary Sciences) / CiteScore - Q1 (Economics, Econometrics and Finance (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.9 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
