

Special Issue

Forensic Anthropology and Human Biological Variation

Message from the Guest Editors

I would like to invite you to participate in this Special Issue on “*Forensic Anthropology and Human Biological Variation*”. Forensic anthropology is currently more than just an interdisciplinary science situated between forensic medicine and anthropology; it successfully addresses specific issues using the knowledge of human variability (e.g., reconstruction of height and weight; facial approximation and its ethnic specifics; estimation of biological age; forensic podiatry; and analysis of fingerprints, palm prints, lip prints, ear prints, and more). The aim of this Special Issue is to focus on just this area of forensic anthropology, but we also welcome interdisciplinary studies or studies dedicated to human variability applicable in forensic anthropology. I look forward to seeing how together we can contribute to this important and fascinating scientific discourse.

Guest Editors

Dr. Radoslav Beňuš

Department of Anthropology, Faculty of Natural Sciences, Comenius University, Ilkovicova 6, 84215 Bratislava, Slovakia

Dr. Zuzana Obertová

Centre for Forensic Anthropology, School of Social Sciences, The University of Western Australia, Perth 6009, Australia

University, Miami, FL 33199, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 27 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the first half of 2025).
