Special Issue

Forensic Geoscience and Death Investigations

Message from the Guest Editors

Forensic Geoscience at crime scenes is of paramount importance with particular regard to death investigations. This Special Issue will deal with some of the ways in which the body and environment can provide evidence of the death circumstances with the help of different forensic fields such as archaeology, geology, geophysics, remote sensing, GIS, botany, entomology, osteology, anthropology, and statistics. The Special Issue welcomes papers on (but is not limited to) principles of forensic search, crime scene investigations, missing persons, forensic geosciences, forensic biology, disaster victim identification, and fire investigation, as well as discovering how the stage of decomposition, the environment around the body or even what the person had last eaten may help determine when and how they died.

Guest Editors

Dr. Rosa Maria Di Maggio

Dr. Alastair Ruffell

Dr. Pier Matteo Barone

Dr. Laurance Donnelly

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Bruce Royston McCord
Department of Chemistry and Biochemistry, Florida International
University, Miami, FL 33199, USA

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:
indexed within ESCI (Web of Science), Scopus, EBSCO,
and other databases.

Rapid Publication:
manuscripts are peer-reviewed and a first decision is
provided to authors approximately 27 days after
submission; acceptance to publication is undertaken in 5.8
days (median values for papers published in this journal in
the first half of 2025).
