Deadline for manuscript submissions:

20 November 2024

Message from the Guest Editors

The business environment has considerably changed in recent years. The main drivers of these changes are digitalization and concern for the environment and natural resources. Companies (and societies) are integrating digital technologies into all aspects of their business activities with the aim of increasing competitiveness and efficiency and promoting innovation. However, these changes also bring with them numerous challenges regarding management. In addition, the requirements for sustainability and the implementation of circular economy concepts in business extend far beyond the boundaries of individual business units. Therefore, these changes must happen throughout the entire value chain, including the forest-wood value chain. Articles addressing the changes in the management of the wood-based sector, focusing on digitalization and sustainability, and offering innovative solutions to these challenges will be considered for this Special Issue. Original papers, reviews, and short communications are all welcome.

Keywords

wood industry
management
digitalization
digital competences
green economy
sustainable management, forest-wood value chain
wood products

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
