Deadline for manuscript  
submissions:

**closed (10 December 2019)**

### Message from the Guest Editor

The biodiversity of forest ecosystems is affected by climatic, edaphic and geographic factors, together with natural disturbances and human-controlled forest management. Global climate change causes weather anomalies, including severe droughts, shifts in precipitation patterns and intense storms that are reflected by the diversity and variability of forest ecosystems. Large scale-disturbances together with fragmentation of forest areas, intensive management, especially non-native tree planting, and invasion of alien species are contributing to biodiversity loss and the disappearance of rare forest species and thus, the homogenization of forest vegetation. Thus, improvement of the understanding of the processes that shape forest diversity, resistance to invasions, and regeneration after natural disturbances is essential. The goal of this Special Issue is to gather knowledge about the diversity, variability and habitat characteristics of forests to determine how these ecosystems react under stress and to improve predictions of the effects of climate and land-use changes on ecosystems.

## Editor-in-Chief

**Prof. Dr. Giacomo Alessandro Gerosa**

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)
