University, Corvallis, OR, USA

Deadline for manuscript  
submissions:

**closed (31 December 2018)**

### **Message from the Guest Editors**

Forest biomass production strategies vary from full tree chipping of energy plantations to various levels of harvest residue utilization including small trees, tops, branches, and stumps. A barrier to effective use of forest biomass has been the high cost of collection and transport.

This Special Issue of *Forests* is focused on forest biomass production and transport and methodologies (operational or policy driven) to reducing barriers to cost effective utilization of forest biomass. Research articles may focus on any aspect of forest biomass production and transport supply chain at the strategic, tactical, or operational planning level. Biomass production can be from energy plantations or forest harvest residues. Topics could include, but are not limited to, new decision support systems, improved systems for densification, methods for mitigating potential environmental impacts from biomass removal, improving equipment utilization, use of depots or transportable facilities, appropriate equipment selection, and the effect of policy instruments on operational costs.

## Editors-in-Chief

### **Prof. Dr. Cate Macinnis-Ng**

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

### **Prof. Dr. Giacomo Alessandro Gerosa**

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
