Deadline for manuscript submissions:

closed (31 March 2019)

Message from the Guest Editor

Forests and forest-based communities are facing changing economic, environmental, social and cultural conditions that challenge their ability to pursue sustainability. To address these challenges, new frameworks such as “resilience”, “intersectionality”, “ecosystem goods and services”, and “biocultural diversity” suggest attention should be given to a much wider and more dynamic set of principles and a broader set of actors than was envisioned by the international community when sustainable forest management was introduced in the 1990s. This special issue will invite authors who have conducted research with forest-based communities to explain one of these frameworks, describe its key features, and demonstrate its application to forest sustainability through the particulars of a local context. Empirical research will feature articles from the global north and global south that have both a theoretical and an empirical contribution, with an effort to share transferable lessons, while recognizing that local context will always be a primary consideration when pursuing sustainability in forestry.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
