Ecosystems and Society, Oregon
State University, Corvallis, OR,
USA

Dr. Jaroslav Klápště

Quantitative Genomics Team,
Scion (New Zealand Forest
Research Institute), Rotorua, New
Zealand

Deadline for manuscript
submissions:

closed (14 June 2024)

Message from the Guest Editors

Large-scale genomic information has already changed forest genetics, and new approaches are on the horizon. However, rapid advances have widened the gulf between researchers and the users of genomic information. We aim to review the latest research on forest tree genomics and facilitate dialog among researchers and expert practitioners. We seek review articles, short perspective papers, and contributions describing original research and applications of structural, functional, evolutionary/comparative, quantitative/population, and ecological/landscape genomics in forest trees. Research on non-forest species is encouraged, if implications for forest trees are clear. Our goal is to ‘connect-the-dots’ between genomic research and application. Thus, your paper should include a discussion of the timeline and steps involved in translating genomic research into operational activities in ways that are clear to knowledgeable practitioners. We also encourage papers that describe downstream applications and priority needs for genomic information from a user’s perspective. Papers from breeders, conservationists, ecologists, and physiologists are particularly relevant.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
