Message from the Guest Editor

Dear Colleagues,

As one of the many instances of human activity, forest operations shape the environment and affect the lives of people, for better or for worse. Efficiently managed forest operations offer the highest benefit and the lowest cost, in all fields: financial, social and environmental. Increasing the efficiency of forest operations is the main goal of forest engineering, which represents a special sector of interest within the field of forestry, while maintaining a cross-disciplinary character. Forest engineering often deals with practical issues that have a strong economic impact, concentrated within a relatively short time span. For this reason, the industry has always had a strong interest in forest engineering, which explains the close connection between scientists and economic operators.

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex, GeoBase, Scopus and other databases.

CiteScore 2017 (Scopus): **2.31**, which equals rank 17/129 (Q1) in the 'Forestry' category.
