Göttingen, Germany

Deadline for manuscript  
submissions:

**closed (15 October 2019)**

### **Message from the Guest Editor**

Successful tree regeneration depends on many key factors, including mature mother trees for natural regeneration, light regime, competition, herbivory and other biotic or abiotic impacts. In order to sustain the current tree species composition or to enhance tree species diversity in old forests, it is many times questionable to achieve this with natural regeneration and under total protection. Depending on the forest ecosystem, legal constraints and the owner's objectives and management strategies may be very different. Here, we are seeking studies that either found stable patterns of self-preservation in mature and old forests or studies describing ways to increase the resilience of the forest ecosystem in times of climate change. Investigated management strategies could e.g. focus on total protection, on artificial tree species enrichment, on other silvicultural treatments, on wildlife management or on forest protection measures (against insects, fungi, etc.). We are looking forward to your contribution to this Special Issue in order to gain a deeper insight into strategies of forest ecosystem management focusing on the protection of mature and old forests.

## Editors-in-Chief

### **Prof. Dr. Cate Macinnis-Ng**

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

### **Prof. Dr. Giacomo Alessandro Gerosa**

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
