### Message from the Guest Editors

Dear Colleagues,

The objective of this Special Issue in *Forests* is to summarize state-of-art knowledge on Forest Tree Stress Physiology by exploring all players involved in the stress response chain: from the drivers to the mechanisms involved in plant–environment interactions. Moreover, we would like to report if basic plant research discoveries are being translated into technologies or approaches that may improve forestry adaptation and surveillance—a vital issue in meeting the foreseen climate-related challenges. Review articles and original research papers in forest trees related with all forms of biotic and abiotic stress, including plant physiology approaches (from classical physiology to molecular techniques), are welcome.

Dr. Gloria Pinto

Dr. Joana Joana

Dr. Jorge Martin Garcia

## Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex, GeoBase, Scopus and other databases.

**CiteScore** (2018 Scopus data): **2.32**, which equals rank 20/139 (Q1) in the 'Forestry' category.
