Finland (Luke), Yliopistokatu 6B,
FI-80100 Joensuu, Finland

Deadline for manuscript
submissions:

closed (5 June 2021)

Message from the Guest Editors

This Special Issue of *Forests* is focused on the sustainability of wood yield in the context of active forest management. To utilize wood and forest biomass resources for bioenergy, technically feasible and economically viable wood and forest biomass resources should be estimated accurately considering their long-term availability as well as important environmental and social aspects, while maintaining or enhancing the ecological, economic, and social functions of forests. To promote sustainable wood and biomass utilization, cost-effective and environmentally friendly wood and forest biomass supply chain management should be developed in order to meet the demand for both traditional uses and new innovative high-added-value materials. Innovation is also required in order to replace outdated facilities, systems, and equipment with more efficient and low-GHG-emission options at multiple points along the bioenergy and bioproducts supply chains

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
