Message from the Guest Editors

Dear Colleagues,

Agroforestry is an intensive land management system involving the integration of tree management into crop and animal farming. It provides diverse ecosystem services by bridging agriculture, forestry, and husbandry to offer environmental, economic, and social benefits. In order to improve the benefits of agroforestry to meet development and climate goals, a systematic approach is necessary for understanding agroforestry practices, designing agroforestry policies and associated outcomes. Multiple methodologies, including systematic review and landscape restoration approaches, can be applied to analyzing agroforestry policies and ecosystem services derived from agroforestry practices. Therefore, this Special Issue focuses on systematic approaches to agroforestry policies, strategies, and practices. It includes case studies from several countries from Asia to explore economic, social, and environmental dimensions.

Dr. Himlal Baral

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
