### Message from the Guest Editors

Dear Colleagues,

The world is facing what will most likely be the greatest challenge humanity has ever known. Climate change is a phenomenon, or rather a set of phenomena, that directly influence the daily lives of human populations all over the planet. However, this normally negative influence also affects ecosystems, with an emphasis on agroforestry systems, of which human populations are directly dependent on for food and a large number of primary raw materials. It is with this premise as a starting point that this Special Issue will analyze the current state of climate change in forest ecosystems, analyzing the causes, and its impacts, consequences, and evolution.

## Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:**—free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex, GeoBase, Scopus and other databases.

**CiteScore** (2019 Scopus data): 2.7, which equals rank 41/140 in the 'Forestry' category.
