Prof. Dr. Tiziana Panzavolta

Department of Agriculture, Food, Environment and Forestry, University of Florence, 50144 Florence, Italy

Deadline for manuscript submissions:

closed (30 June 2021)

Message from the Guest Editors

Forest protection has now become an important global priority. The arrival of new diseases and pests in uncontaminated territories and the resurgence of old, known agents of damage pose serious threats to trees in natural ecosystems as well as in urban forests, impacting ecosystem services. Climate change further exacerbates the problem, weakening forest trees and creating conditions for the range expansion of invasive diseases and pests. Furthermore, the growing trade of seedlings and other propagation material (seeds, cuttings, etc.) is boosting the spread of plant and animal parasites, seriously compromising forest and ornamental nursery activities. With the globalization of trade, the development of diagnostic tools for the early detection of latent pathogens and pests has become crucial. In this context, forest pathology and entomology have become more relevant than ever. We encourage studies from all these fields, including monitoring, epidemiology, ecology, diagnostics and pest and disease management and control to promote the dissemination of knowledge in forest protection for the preservation of structure, diversity, and resilience of natural and urban ecosystems.

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)
