Message from the Guest Editors

Dear Colleagues,

The general aim of this Special Issue is to address the role played by patterns and processes of forest ecosystems in the provision of goods and services.

How multiple ecosystem services and related values are acknowledged, appropriated, or delivered to society is strongly related to their spatial patterns of distribution and the ecological processes that generated them.

This Issue aims to explore the effects on ecosystem services of multi-scale features such as heterogeneity, diversity and connectivity of forests, or the spatial relationships between forest ecosystems and other land uses, but also processes ranging from specific interexchanges of matter, energy, and information to more generic relationships between forests and society at the social-ecological level.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
