Message from the Guest Editors

Humans have a long history of interaction with forests and other natural landscapes (FNL), with these environments being progressively more recognized for their contributions to human health. Historically, scientists have considered these settings in terms of supplying a set of ecosystem goods and services, many of which make important contributions to human wellbeing. Increasingly, FNLs have also been recognized for providing less tangible, but often equally important, services.

New technologies enable researchers to better articulate the variety of ways that FNLs contribute to a sense of wellbeing and human health. Moreover, outcomes related to time spent in forest environments include improved immune system function and decreased stress hormones, among others. Research also suggests that FNLs may translate to substantial healthcare savings, and carry numerous public policy implications.

We encourage submissions from the biological, sociological, and psychological sciences, in order to promote knowledge that contributes to public policy development and FNL management approaches by providing documented linkages between forests and human health.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
