Message from the Guest Editor

We are currently faced with many important social and environmental challenges when it comes to forest management. We are fortunate that forest resources can support the many economic, environmental and social needs of society. Managing forests for diverse, sustainable goals can be made complicated by the volume and complexity of information that one should consider, and the broad array of scenarios that one should examine. As forest managers continue to adjust to societal demands for production, it is evident that cultural, regulating, and supportive ecosystem services, as well as new and innovative approaches, should be considered and assessed, to promote knowledge development. This Special Issue welcomes original research studies that describe advances in decision-making processes and analyses aimed at the active management of forests. Applications of well-described decision-making processes to new management problems involving the scheduling and placement of management activities are also welcome. Papers should have a practical or place-based issue at their core. Moreover, advances in theories should be accompanied by practical, quantitative applications to real landscapes.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
