Special Issue

Forest Wildlife Biodiversity Monitoring and Conservation

Message from the Guest Editors

This Special Issue considers research or review manuscripts with a global impact on some of the dimensions of forest wildlife conservation (biological, social, ethical, or economic ones, among others). There are still some explored places on the planet, and their study and analysis will help to understand the biodiversity of wildlife. We will disseminate global impact studies with multidisciplinary and interdisciplinary approaches to the monitoring, analysis, and conservation of forest wildlife biodiversity. Multidisciplinary and interdisciplinary manuscripts focused on forest wildlife biodiversity and its conservation that provide practical tools can be received. This Special Issue will include manuscripts that analyze the effect of anthropic activities on the temporal and/or spatial patterns of forest ecosystems' richness, diversity, structure, and functions. Additionally, these manuscripts may propose monitoring, analysis, actions and strategies to prevent, conserve, and/or restore any of the wildlife biodiversity. They may include the effect of habitat loss or fragmentation, human infrastructure, invasive species, climate change, or the role of protected areas.

Guest Editors

Dr. Octavio Monroy-Vilchis

Dr. Martha Mariela Zarco-González

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have Forests be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
