

## Special Issue

# Implications for Soil Respiration in Forest Carbon Sequestration

### Message from the Guest Editors

As the largest carbon efflux from terrestrial ecosystems to the atmosphere, soil respiration is essential to the global carbon balance. In this Special Issue on “Implications for Soil Respiration in Forest Carbon Sequestration”, we will report new insights of soil respiration interacting with forest diversity, root functional traits and soil microbial composition under global change, and new estimation of global/regional soil respiration and its components by machine learning and terrestrial ecosystem models. Potential topics include, but are not limited to:

1. New understanding of the interplay between forest diversity and soil respiration;
2. New advances of soil respirations in response to global change;
3. Biogeochemical mechanisms between soil respiration and soil organic carbon composition;
4. Interactive effects of root functional traits and microbial composition on soil respiration;
5. Data-driven estimation of global/regional soil respiration and its components;
6. Improvements of terrestrial ecosystem models;
7. Uncertainty in estimating soil respiration at the local, regional and global scale.

### Guest Editors

Dr. Haibo Lu

Dr. Bingwei Zhang

Dr. Lingyan Zhou

Dr. Yi Wang

### Deadline for manuscript submissions

closed (30 November 2023)

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
