Special Issue

Species Richness, Diversity and Habitat Modeling of Wildlife in Forests

Message from the Guest Editor

Wildlife includes all animal organisms that live freely in the natural environment and occupy specific habitats according to their ecological needs. Forest ecosystems are notable for their considerable diversity of life, with many locations identified as exceptional examples of global biodiversity. Forest fauna plays a crucial role in maintaining the stability and health of forest ecosystems, interacting with humans through complex mechanisms. In addition to the direct benefits that forest wildlife provides to humans, such as food and recreational opportunities, numerous indirect advantages are associated with ecological processes, such as trophic relationships, energy flow, and nutrient recycling. This Special Issue focuses on enhancing our comprehension of the species richness, diversity, wildlife habitat modeling, and wildlife conservation in forest environments. It comprises research papers and reviews that delve into the complex relationship between wildlife and their habitats.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa
Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:
JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
