

Special Issue

Genetic Resources and Prebreeding

Message from the Guest Editors

The conservation and genetic analysis of woody and non-woody plant germplasm resources, primarily consisting of woody plants, as well as the development and application of both classical and modern breeding technologies, have propelled innovations in plant breeding science. This Special Issue aims to promptly showcase the latest advancements in tree germplasm resources and their genetics and breeding.

Potential topics include, but are not limited to:

- Germplasm and live material collection of genetic resources for newly developed, underdeveloped, and little-developed tree species;
- Genetic evaluation of collected genetic resources for newly developed, underdeveloped, and little-developed tree species;
- Germplasm conservation of genetic resources for newly developed, underdeveloped, and little-developed tree species;
- Germplasm use and the prebreeding of genetic resources for newly developed, underdeveloped, and little-developed tree species;
- Innovative theories or technologies for germplasm resources for newly developed, underdeveloped, or little-developed tree species.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
