

Special Issue

Forest Wildlife Biology and Habitat Conservation

Message from the Guest Editors

Forests and ecological systems formed by forests, together with forest wildlife, are an important link in the chain of maintenance and preservation of nature on a global level. The management of forest wildlife is not regulated on a global level, so there are numerous examples where various negative impacts have led to a significant reduction in and in some cases to the complete disappearance of certain forest wild animals from an area. These influences can be instant or cumulative.

In order to contribute to a better understanding of the complex relationships within forest ecosystems, this Special Issue aims to improve the knowledge of endangered and rare forest wild animals and the relationship between wildlife and habitat, to discover the possibilities of improving this relationship and preserving forest habitats for wildlife.

Potential topics include, but are not limited to, the following:

- Forest wildlife biology and ecology;
- Forest wildlife conservation;
- Forest exploitation–wildlife interactions;
- Wildlife habitat conservation;
- Forest wildlife management.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
