

## Special Issue

# Wood-Based Composite Materials and Products: Development and Performance Characterization

### Message from the Guest Editor

Regardless of the dimensions and shape of the parts of processed wood, wood-based composites have been manufactured for the most diverse purposes, including uses in furniture (Medium Density Particleboard (MDP), Medium Density Fiberboard (MDF), etc.), materials such as thermal-acoustic insulation, and frameworks (Oriented Strand Board (OSB), Laminated Veneer Lumber (LVL), etc.). The search for materials that have less impact on humans and nature motivates the development of new adhesives. Modified adhesives are usually used in the manufacture of panels with the inclusion of other natural fibers (by-products), residues from synthetic products that are potential aggravating factors for the environment, heat treatments aimed at producing the best performance of these composites under different weather conditions, and to stop attacks by xylophagous agents, among others. This Special Issue focuses on the dissemination of research on alternative wood-based composites and various lignocellulosic residues, as well as their potential applications.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
