# Microbial Community Structure and Soil Health in Forests

## Message from the Guest Editors

Soil is a complex system, and its functions are critical to ecosystem sustainability through its support of relevant ecosystem services (e.g., carbon sequestration, climate regulation, food production, habitat for organisms, soil and water quality and quantity). Soil health is a relatively new concept (emerged in the early 2000s) and is defined as the soil conditions predicting its functioning as a vital ecosystem. It is a broader concept than soil quality and emphasizes the overall living components of the soil. This framework highlights the biological perspective of sustainable soil management for high plant production in forest ecosystems and simultaneously promotes a soil microbiome requiring management of microbial abundance and activity. community composition, and specific functions. Potential topics include, but are not limited to, the following:

- Soil biological quality indicators in forest soils;
- Soil microbiome and its recruitment by plants;
- Soil microbial contributions to soil and plant health;
- Soil health indexes and forest soils;
- Agroforestry systems and soil health;
- One health and forest soils.

## **About the Journal**

## Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have Forests be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

#### Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

#### **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
