Special Issue

Ecology of Forested Wetlands

Message from the Guest Editors

Forested wetlands, more commonly known as swamps, flatwoods, mangals (mangroves), or inundated forests, have a wide distribution, occurring on every continent except Antarctica. They are extensive in equatorial areas (e.g., the Amazon) and the most abundant wetland type in temperate and boreal regions. Approximately 3% of the global land area is wetland and of this, it is estimated that 60% is forested. Compared to upland forests, forested wetlands are a relatively understudied ecosystem world-wide. These forest ecosystems are also subject to a series of disturbances related to extreme climatic phenomena. We invite researchers to contribute to this Special Issue of the journal Forests focusing on 'Ecology of Forested Wetlands' in order to promote knowledge on the drivers, patterns, mechanisms, and consequences of natural and anthropogenic events, including the estimation of the resistance, resilience, and recovery of these forested wetlands. Studies involving empirical, retrospective, and prospective approaches and using multiple disciplines (forestry, ecophysiology, dendroecology, pathology, climatology, etc.) are welcome.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have Forests be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
