Tree Growth in Relation to Climate Change

Message from the Guest Editors

The impact of climate on tree growth has recently received increased interest in the context of climate change. Species-specific traits, environmental conditions, and the spatio-temporal scale of the study appear to be the major factors explaining the complexity of the relationship between growth and climate change. The growth pattern associated with climate change could provide essential insights to highlight the potential interspecific growth competition. Hence, this will detect possible spatiotemporal shifts in species distribution, especially in the more limiting environment (species' leading and trailing ranges, or at higher elevations). Therefore, this Special Issue focuses on improving the current knowledge of how climate change affects tree growth. Potential topics include, but are not limited to:

- Tree growth and spatio-temporal climate change
- Tree growth at the species' northern or altitudinal limits
- Competition in tree growth at the ecotone between two forest types
- Comparison in tree growth between geographic provenances
- Dendroclimatology
- Dendroecology

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
