Special Issue

Advancements in Bamboo and Rattan: Insights into Molecular Biology, Physiology, Ecology, and Applications

Message from the Guest Editors

Bamboo and rattan are invaluable forest resources that not only furnish raw materials for industry but also play a crucial role in ecosystems. Since the release of the first version of the Moso bamboo genome in 2013. remarkable advancements in bamboo research have been achieved. For instance, topics such as the rapid growth and flowering mechanisms of bamboo have been elucidated. Furthermore, regeneration systems and gene editing techniques in bamboo have been established. However, when compared to other plants like Arabidopsis and rice, the progress of research in bamboo and rattan remains relatively slow. As such, colleagues working in the field of bamboo and rattan face both great opportunities and challenges. The aim of this Special Issue is to compile and showcase the latest progress in both basic and applied research encompassing all facets of bamboo and rattan, including molecular biology, physiology, ecology, and applications. We welcome the submission of research articles, case studies, reviews, and perspectives on these topics.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have Forests be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
