

## Special Issue

# Tree Water Physiology and Ecology - Xylem Structure and Function

### Message from the Guest Editors

The elaborate structure of xylem conduits ensures the supply of large amounts of water to the photosynthetic organs, which will have a significant impact on plant performance, forest community/ecosystem processes, and global water/carbon cycle. Research on xylem structure and function has been active for decades, and has become a hot topic of plant water physiology because of the rapid global change. With this Special Issue of *Forests*, we aim to provide new insights into xylem structure and function. Manuscripts are welcomed in the form of original research or review papers that address novel aspects of xylem structure and function at the whole-tree, forest community, and ecosystem level, especially in the context of global climate change. Potential topics include, but are not limited to, the following: 1) Linkages between xylem structure and function and whole-tree performance, community or ecosystem processes. 2) Novel methods in the research of xylem structure and function. 3) Plasticity of xylem structure and function along environmental gradients. 4) Variation in water-use strategies of trees and their adaptation mechanism under global climate change.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
