

Special Issue

Restoration in Pine Forests

Message from the Guest Editor

The genus *Pinus* includes over 100 species, occurring as native species mainly in the Northern Hemisphere, but pines, as a cultivated and very useful trees, are also widely distributed in the southern part of the world. Thanks to its adaptability, the genus *Pinus* inhabits a variety of habitats, from peat forests, through forests on coastal and inland dunes to relict mountain forests. Therefore, the genus *Pinus* plays an important role not only in economic but also in natural terms. Equally, however, many problems of restoration of pine forests, caused by natural factors and human activity, are observed. Therefore, this Special Issue aims to give an overview of the most recent advances in the field of management, protection, and restoration of forests composed of trees of the genus *Pinus*. Potential topics include but are not limited to:

- Natural and artificial regeneration of pine forests;
- Natural threats in pine forests (insects, mistletoe, fires, others);
- Environmental value of pine forests;
- Habitat requirements of pine forests under global climate changes;
- Forest management of pine forests;
- Future of pine forests in protected areas.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
