Special Issue

Biological Community Responses to Forest Restoration

Message from the Guest Editor

Various restoration attempts focus on forest environments. Our understanding of the responses given by the biota found in these forests when restorative actions are taken is crucial in order to evaluate the effectiveness of such attempts. This special issue of Forests welcomes articles that review, evaluate, and theorize on biological community responses to forest restoration, from ecological, genetical, or evolutionary viewpoints. Keywords species richness functional diversity phylogenetic diversity food webs biological productivity colonization biotic dispersal field of dreams hypothesis

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have Forests be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
