

Special Issue

New Tools for Forest Science

Message from the Guest Editors

Forest ecosystems provide a series of essential products and services for humanity. To ensure the continuity of the benefits provided by forests, it is essential to promote their sustainable management, which ensures numerous environmental, social and economic benefits. In this context, the search for new tools and technologies applied to the various operational processes related to forest conservation and/or production is of fundamental importance for the sustainable development of Forestry Science. Therefore, this Special Issue of *Forests* aims to publish research results that innovatively approach the use of new tools and technologies applied to Forestry Science. These innovations involve a broad scope and can be related to both the improvement of operational procedures and the analysis of data applied to different areas, such as plant breeding, neutralization of carbon emissions, forest measurement, modeling of forest growth and production, nature conservation, product use technologies forestry, forest protection, and computational tools, among others.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
