Special Issue

Influence of Environmental Changes on Forest Soil Quality and Health

Message from the Guest Editors

Natural disturbance and human activity have resulted in significant structural, functional and environmental changes in forest ecosystems. These changes directly or indirectly impact the quality and health of forest soil. Key indicators of these impacts include soil organic matter, carbon pools, carbon sequestration capacity, soil fertility, nutrient cycling, soil water content, soil temperature, soil fauna, and the composition and activity of soil microorganisms. However, the specific extent and mechanisms of how environmental changes affect soil quality and health are still not fully understood. This Special Issue aims to provide an overview of recent developments in the field of forest soil quality and fertility in relation to environmental change. Potential topics include, but are not limited to:

- Amount and distribution of carbon stocks in soil;
- Ecological stoichiometry of soil nutrients;
- Carbon sequestration capacity;
- Evaluation of soil quality;
- Dynamic patterns of soil CO2 efflux;
- Phytoremediation of polluted soils;
- Role of soil animal community in the improvement of soil property;
- Relationships between soil physicochemical properties and soil carbon pools.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and crossdisciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
