

## Special Issue

# Lignocellulosic Fiber-Based Composites

### Message from the Guest Editors

Lignocellulosic fibres are one of the natural fibres which can be obtained from plants and are generally considered to be one of the most promising researched materials for replacing synthetic engineered fibres. This is due to the inherent behaviours of lignocellulosic fibres, including their renewability, wide availability, low production costs and biodegradability. Currently, various sectors have started to employ lignocellulosic-fibre-based composites in applications such as food packaging, transportation, sport goods, household appliances and construction, biomedicine, buildings and electronic devices. The application of lignocellulosic-fibre-based biocomposites results in the improved performance of transportation vehicles as it reduces their weight, which in turn lowers fuel consumption and carbon dioxide emissions. Thus, the objective of this Special Issue is to compile and gather the most recent, advanced research on the characteristics, manufacturability and sustainable product development of innovative lignocellulosic-fibre-based composites.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
