

Special Issue

Drought Impacts on Wood Anatomy and Tree Growth

Message from the Guest Editors

Climate change has caused more frequent extreme drought events, which increasingly threaten ecosystem function and services and weakens the potential to mitigate climate change. Understanding the impacts of drought on tree growth and wood anatomy at different time scales is pivotal for assessing drought effects on forest ecosystem functioning and providing useful management options for forest adaptation. We are pleased to invite researchers to contribute to this Special Issue focusing on “Drought Impacts on Wood Anatomy and Tree Growth”.

The aim of this Special Issue is to assemble related data to advance our understandings of drought impacts on forest growth, productivity, and wood anatomical properties. Studies using retrospective, modeling, and observational approaches, including but not limited to dendrochronology, wood anatomy, micro-coring, dendrometer, sap flow, etc., are welcome.

We look forward to receiving your contributions.

Guest Editors

Dr. Xinsheng Liu

School of Geography and Tourism, Anhui Normal University, Wuhu 241002, China

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
