Special Issue

Innovations in Sustainable Strategies for Managing Forest Ecosystem Services

Message from the Guest Editors

Forest ecosystems provide crucial services, including carbon sequestration, water regulation, soil fertility, and biodiversity support. With increased pressures from climate change, deforestation, and land use changes, there remains a need for innovative strategies that balance environmental, economic, and social goals. We aim to explore sustainable strategies for managing forest ecosystem services, provide an overview of recent advancements in the field, and highlight novel methods to enhance the resilience and functionality of forest ecosystems. We invite papers that address the theoretical and practical aspects of a wide range of topics related to sustainable forest management practices, including but not limited to:

- Innovative approaches to forest conservation and restoration;
- Strategies for enhancing carbon sequestration and climate change mitigation;
- Integration of ecosystem services into forest management plans;
- Evaluation techniques for assessing forest ecosystems;
- Socio-economic impacts of sustainable forest management;
- Advances in monitoring and assessment technologies for forest ecosystems;
- Case studies of successful sustainable management practices

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have Forests be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
