

Special Issue

Growth and Yield Models for Forests

Message from the Guest Editors

Forests are critical in addressing global issues of sequestering carbon while providing renewable materials, energy, and ecosystem services. Reliable forest stand dynamics, growth, and yield models are required, including stand-level, tree-level, and spatial modeling. Contributions to this Special Issue are encouraged in all aspects of growth and yield modeling, including data collection and analysis, yield tables and allometric equations, parametric and non-parametric approaches, including empirical and process-based models, and model calibration and validation. Seeding, regeneration, recruitment, competition dynamics, and mortality (including biotic and abiotic disturbances) are fundamental parts of the forest ecosystem cycle and are often not considered in model development due to their complex interactions and feedback. This Special Issue aims to publish original research papers on forest growth modeling and yields amidst evolving environments, alongside review articles that extensively examine the current assessment of forest growth and yields.

Guest Editors

Dr. Elia Vangi

Dr. Alessio Collalti

Prof. Dr. Gherardo Chirici

Deadline for manuscript submissions

25 October 2025

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
