# How Natural and Anthropogenic Disturbances Affect Plant Communities in Actively Managed Temperate Forests

### Message from the Guest Editors

We invite new or original research as well as review papers addressing the role of natural and/or anthropogenic disturbances in shaping plant communities of actively managed temperate forests, and the implications of this research for management of these forests in an uncertain future to be published in this Special Issue. Both experimental and observational studies are welcome. Potential topics may include, but are not limited to:

- Characteristics of disturbed forest plant communities;
- Dynamics of stand structure and composition;
- Forest restoration and conservation;
- Forest resilience and stability;
- Sustainable forest management.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
