Recent Developments in Propagation Techniques and Their Application for Forest Trees

Message from the Guest Editors

The aim of this Special Issue, entitled “Recent Developments in Propagation Techniques and Their Application for Forest Trees”, is to attract contributions detailing new advances in plant tissue culture focusing on micropropagation, organogenesis, somatic embryogenesis, gene transformation, seed germination, plant growth regulators, and other applications of plant culture research in vitro. We welcome the submission of original research papers, reviews, and novel in vitro protocols including, but not limited to, the following topics:

- In vitro propagation;
- Micropropagation;
- Organogenesis;
- Somatic embryogenesis;
- Tree biotechnology;
- Genetic transformation;
- Plant growth regulators;
- Seed germination;
- Tree Breeding;
- Tree propagation and cultivation.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.
